

Logic Model Worksheet

Vision

Population Served

Problem(s) to be addressed

Services (out puts—what is provided for participants)

Outcomes (What participant changes will the services achieve?)

Indicators (What will we see or hear that indicates the outcomes have been achieved?)

Measurement/Sources of Data
(How will the outcomes be measured?)

Resources available (funds, infrastructure, supplies and equipment, etc.)

Resources required (funds, infrastructure, supplies and equipment, etc.)

Assumptions (Why do we believe this service will result in positive outcomes for the population we serve?)
